FERNANDO KOJI YAMASHIRO
Web Developer
🗺 **Brazil, São Paulo**

About Me:

Graduated in Computer Engineering, I've been working as a web developer. At the moment, my goal is to obtain more professional experience in the area, which requires constant growth.

Most of my experiences were related to API development rather than front end design, but I'm open to work on both, or other activities.

Main Skills:

NodeJS
VueJS
Typescript
Cloud Services

Professional Experience

- **[May 2022 - September 2022] Mutant-Vivo**
  Development and maintenance of the use case dialogs in the context of customer service via WhatsApp for Aura, VIVO's AI. At this job, I've acquired more knowledge of Agile Methodologies, typescript, use of javascript classes and npm packages development.

- **[March 2022 - May 2022] RifaIsso**
  Development of the complete API for Rifaisso, a system to sell and organize raffles online, made with typescript using AdonisJS.

- **[January 2021 - July 2021] TeachLearn**
  TeachLearn's first commercial versions development. It is a social media for teachers and teaching platform. Made with VueJs using Quasar and NodeJS using ExpressJS.

- **[November 2019 - April 2020] Dourasoft**
  Services as a Freelancer at Dourasoft. I developed a Whatsapp bot made with Java and selenium, and a SQL script for the database migration from their desktop legacy system to their current web app system.

- **[February 2019 - June 2019] Dourasoft**
  Mandatory internship, in which I developed and integrated an OCR functionality, made with AWS Textract, into the company's commercialized system. Besides that, I've learned VueJS using Quasar, PHP using CakePHP, PostgreSQL, Google Cloud Services and Firebase.
